8. HEALTH HAZARD DATA

=====

EYE CONTACT: Liquid and vapor may cause eye irritation.

SKIN CONTACT: May cause skin irritation on prolonged or repeated contact.

INHALATION: Vapor overexposure may cause respiratory system irritation and light-headedness. Methyl ethyl ketone (MEK) is a potential embryo/fetotoxin based on laboratory animal studies. There is no evidence of reproductive effects associated with human exposure to methyl ethyl ketone (MEK). Symptoms of overexposure include headache, dizziness, weakness, fatigue, and on extreme overexposure, unconsciousness.

INGESTION: May cause digestive system irritation and light-headedness. Symptoms of ingestion may include nausea and vomiting. Solvent aspiration into the lungs may cause lung damage or, in the extreme, death.

NOTE: Antimony trioxide has been found to cause cancer in laboratory animal studies. Antimony trioxide is bound in this product so exposure by inhalation is not expected.
